

## DTB22x Software Upgrade Guide

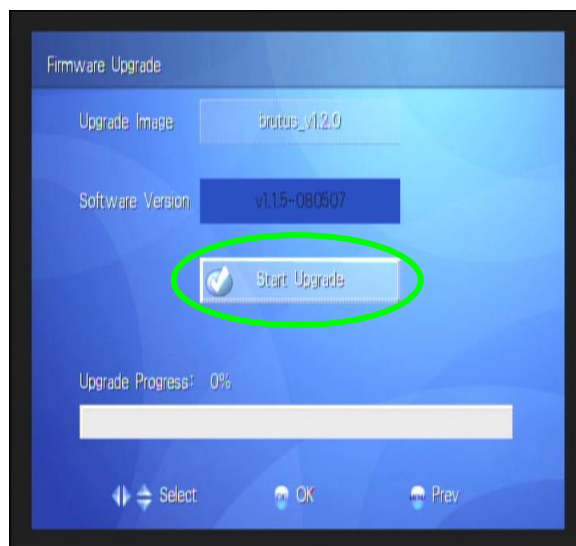

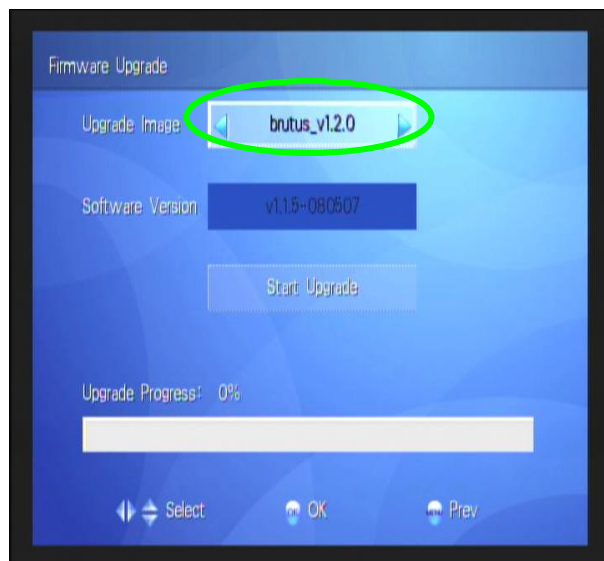

1. Please unzip the downloaded file and copy the unzipped file to the **root directory**, i.e. the toppest directory, in a USB flash disk.

**The accepted disk format is FAT32 or FAT16, without partitions, or making use of first partition.**

2. Plug in the USB disk into the USB slot at the back of the DTB, then power on the DTB.
3. Please navigate the OSD menu to firmware upgrade screen on the OSD Menu via **<Menu>** key → [**Advanced Option**] → [**Firmware upgrade**].

4. Select [**Upgrade Image**] and use **<◀>** and **<▶>** keys to select the target image file. Then, navigate to [**Start Upgrade**] and press **<OK>** key.

5. press <OK> when the "Start firmware Upgrade" dialog shows on the screen, The DTB will enter the upgrade process right away. Please **DO NOT POWER OFF the DTB nor the USB disk** until the upgrade process has completely done.

The DTB225 will automatically reboot after the process is done.
